Gary:

We have not completed a final inspection at the spill site just yet, but have scheduled another inspection of the site for today. See scan of the documents in our file related to this particular incident.

Thanks
Glenn Monette

Glen:

Thanks for the copy of the letter. Have you guys done your final inspection of the response to this incident. I am not sure how difficult it would be but it would be nice to get a scan of the documents in your file related to this particular incident. As you know, Superior is operating on a Superfund Site that is owned by Lazarus Texas Refinery 1 or something like that and we have orders for them to do cleanup unrelated to the superior spills. Superior's actions to address their spills is important and we have told the owner of the site that since they have a lease with Superior that it is their responsibility to make sure that it is addressed to their satisfaction as well since ultimately they will hold the bag if Superior does not do a satisfactory cleanup of their spills.

Thanks
Gary Moore

Gary, the formatting of this letter may not be complete but it gives some of the cleanup standards to be met.

Superior Crude Gathering Docket # 04-0280589 Falcon Refinery P-5 # 830626 San Patricio County

Could I get you to send me information about the tank 13 spill that occurred last year and the cleanup directions that were given to Superior.

What cleanup standards do you use for soil cleanups? Are they required to sample sidewalls and bottom of hole/trench?

Thanks
Gary Moore
